UTM_E.pdf;

Eric,

Attached is the archived manual for UTM found at the following link:

ftp://download.mksinst.com/MotionControl/Archive/Positioner%20Manuals/UTM_E.pdf

The threads are either 1/4-20 or M6:

	Thread	Dimension [in. (mm)]					
Model (Metric)	A	B	Travel [in. (mm)]	.98 (25)	1.97 (50)	3.9 (100)	5.9
UTM (M-UTM)	1/4-20 (M6)	1.0 (25)	L1 [in. (mm)]	6.1 (155)	7.1 (180)	9.1 (230)	11.0

The only accessories that the manual states are:

<https://www.newport.com/p/EQ100-S>

<https://www.newport.com/p/EQ100-L>

Please let me know if this helps.

Linda,

I made requests online for technical support, but haven't received any updates. One was to have either a drawing or a part number for a legacy top plate for old stages UTM50PP.1 S/N B95 716 and B95 394. They have funny screws through the top slider which mate to an accessory tapped plate that I would like to buy or make. You, I think, responded that these stages may not work 100% with XPS-D8.

Can someone get back to me about this top plate?
Eric

Eric

You would need to purchase the [driver module](#) for the stage you are driving. I see you sent in another case on UTM50PP.1. We cannot guarantee the legacy stages will work 100% to spec with the new controllers.

Please let me know if you have any additional questions.

Dorothy, could you remove line 6 and resend please?
I won't buy the XPS-D8 controller this time, but I have one question, does the XPS-D8 also includes the motor drivers so that without any additional equipment I can drive 8 axes?

Thanks,
Eric
